

STUDIO AI · SMART CAMPAIGNS

Put the Right Offer On the Right Car At the Right Time

Win the attention battle before a buyer ever sees your price.

THE CHALLENGE

Dealership campaigns today are fragmented, manual, and easy to miss.

The right visual promotion can cut days-on-lot by 30%. The problem? Execution almost never keeps up.

Promotions Expire Unnoticed

Seasonal and manager specials go live late, run inconsistently, or expire without anyone noticing. Missed timing means missed sales.

Your Value Doesn't Show

Services, financing, and vehicle highlights go unseen when listings show price alone. Every deal becomes a price negotiation, and margins take the hit.

Aged Inventory Sits Invisible

Vehicles past 30 days look identical to fresh arrivals. No visual urgency means buyers scroll past and the car keeps sitting.

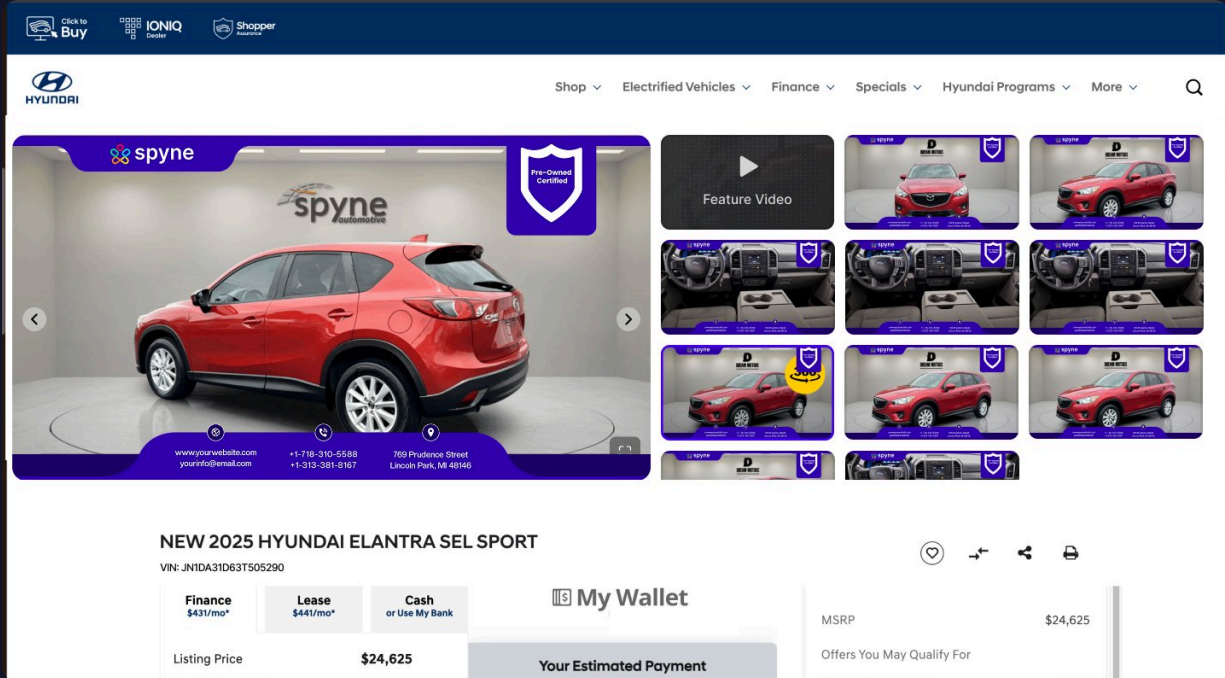

Multi-Rooftop Campaigns Stay Inconsistent

Each location runs promotions on its own terms. Without a shared system, brand presence is uneven and your best offers rarely reach every listing.

INTRODUCING

Smart Campaigns

Run visual promotions across your entire inventory like an expert marketing team would. Automatically.

CAPABILITIES

Four Tools That Get Your Listings Noticed and Your Cars Sold

PROMOTIONAL OVERLAYS

Own the Thumbnail. Own the Click.

Branded images applied directly to vehicle photos so your listings stand out in search results before a buyer clicks through to the VDP.

PROMOTIONAL BILLBOARDS

Tell a Bigger Story

Full-frame images inserted into the VIN photo set to promote dealership offers, seasonal campaigns, or brand messaging.

DYNAMIC TEXT OVERLAYS

Latest Offers Always Live

Price, mileage, and any vehicle field pull live data and update automatically across every listing when values change.

CAMPAIGN CONTROL

Full Lifecycle Management

Create, schedule, pause, activate, or delete campaigns at a single location or across rooftops. Preview each VIN before going live.

PROCESS

How It Works

01

Set Up Your Creatives

Configure overlays, billboards, and text formats. Upload assets and define dynamic fields.

02

Build Campaign Rules

Define rules by VIN groups to apply campaigns across inventory automatically. Target by make, model, age, price, trim, transmission, or certification. New matching VINs are picked up automatically.

03

Preview and Publish

Assign creatives, preview listings per VIN, then schedule or run continuously.

BUILT FOR

High-Volume Dealership Workflows

Festive & Seasonal

Schedule campaigns ahead of time and let them run automatically without any manual updates.

Aged Inventory

Listings past 30 days automatically receive a visual push to drive urgency and faster decisions.

Multi-Rooftop Groups

One campaign applied consistently across all locations so every listing looks on-brand.

Dealership Services & Offers

Showcase free shipping, remote buying, financing terms, or service packages so customers see the full value upfront.

Vehicle Capabilities & Specs

Put low mileage, engine highlights, or certification front and center to help buyers quickly understand what makes each car stand out.

Dynamic Campaigns

Price-based offers and discounts update automatically as VIN data changes. Campaigns adapt to your inventory rules with no manual edits per listing.

COMPETITIVE ADVANTAGE

Smart Campaigns vs. Others

"vAuto tells you which cars to promote. Spyne makes sure they actually get noticed."

DIMENSION	SPYNE SMART CAMPAIGNS	OTHERS
Ageing-Based Targeting	✔ Target by days-on-lot automatically	Not available
Campaign Lifecycle	✔ Create, schedule, pause, activate, delete, prioritize	Limited controls
VIN-Level Preview	✔ Review each VIN before publishing	Not available
Rule Depth	✔ Age, trim, price, transmission, certification and more	Basic filters only
Ecosystem	✔ Standalone, works with any stack	Requires specific ecosystem
Buyer Journey Impact	✔ Drives clicks from search results	Impacts post-click only
Media Foundation	✔ Built on AI-processed images	Uses dealer-uploaded photos

Stop competing on price alone. Start winning on presence.

Every listing that looks like everyone else's is a deal won on discount. Smart Campaigns changes that automatically across your entire inventory.
