

STUDIO AI · VIN CLONING

Go Live on Day 0. Skip the Shoot.

Publish listings the moment you acquire a vehicle, without waiting for it to arrive.

THE PROBLEM

Every Day Your Listing is Dark, a Buyer is Looking Elsewhere

New vehicles take 3 to 5 days to go live after hitting the lot. That is 3 to 5 days of lost visibility, lost leads, and lost revenue on inventory you already own.

New inventory, no listing yet

The VIN is in your system and capital is committed, but buyers cannot find it until the shoot is done.

Shoot scheduling adds days

Coordinating photographers, studio availability, and vehicle readiness delays go-live on every new unit.

Merchandising takes time

Even after the shoot, editing, processing, and quality checks add more time before a listing goes live.

Holding cost adds up daily

At \$40 to \$50 per vehicle per day, every dark listing quietly erodes margin on inventory you already own.

THE SOLUTION

Introducing VIN Cloning

Skip the shoot. Go live at acquisition. Capture demand from Day 0.

VIN Cloning matches incoming VINs to previously shot inventory and instantly publishes studio-quality listings. No shoot. No processing. No wait.

Smart VIN Matching

Go Live Instantly

No Photography
Needed

Capture Demand
Early

Matched on year, make, model, trim, and color.

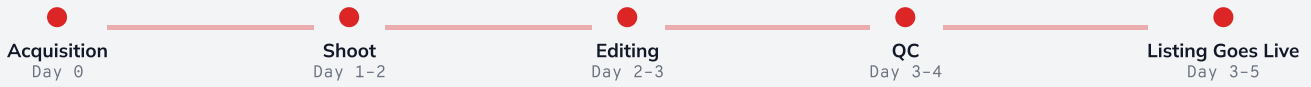

No shoot required. Listings published in seconds.

Studio-quality visuals cloned from existing inventory. Automatically.

Visible to buyers during days your competitors aren't.

A typical dealership adding 20 to 30 new vehicles a week can lose 2,000 to 3,000 dollars in holding cost alone due to listing delays. VIN Cloning eliminates this delay by getting inventory live instantly.

BEFORE Traditional flow · ~3–5 days to listing

Holding cost: ~\$120–\$250 per unit before a single lead

WITH VIN CLONING Listing live at acquisition

No shoot. No processing. **Capturing leads from Day 0.**

FITS YOUR WORKFLOW

Automated or On-Demand

FTP

Fully Automated

Every new VIN in your feed is checked automatically. When a match is found, media is cloned and published. Zero manual effort, zero delay.

CONSOLE

On-Demand

Enter the VIN, review matched vehicles, select your media, and click "Use Media." One click. Live instantly.

BUILT FOR

High-Volume New Car Operations

01

New Inventory Launches

New VIN in your feed? Listing is live instantly. No shoot scheduled, no days lost.

02

Repeat Trims & Variants

Same model, same trim, same color returns to stock? Your media is already there. One click to publish.

03

Multi-Rooftop Groups

Media shot once at any location becomes a live-ready asset across every dealership in your group.

Every new VIN deserves a listing on Day 0. Not Day 5.

VIN Cloning eliminates the shoot entirely. New inventory goes live the moment it enters your system, with studio-quality visuals already attached.
